

TANVI RAWAT

Delhi, India | rawattanvi7@gmail.com | [LinkedIn: Tanvi-Rawat7](#) | [GitHub: rawattanvi7-eng](#)

PROFILE SUMMARY

Data Science undergraduate skilled in Python, SQL, Excel and Power BI. Experienced in data cleaning, exploratory data analysis, visualization and basic machine learning through academic and personal projects. Seeking opportunities to apply analytical skills to solve real-world business problems.

SKILLS

- *Programming Languages:* Python, SQL, R, C++
 - *Data Analysis and Visualization:* SQL, Power BI, Pandas, NumPy, Matplotlib, Seaborn, EDA
 - *Machine Learning:* Data Preprocessing, Feature Engineering, K-Means Clustering
 - *Databases:* MySQL, MongoDB
 - *Tools:* Git, Github, Excel
 - *Web Development:* HTML, CSS, JS, Flask
-

EDUCATION

Bachelor of Technology (B.Tech.), Computer Science Engineering (Data Science) -

JSS University, Noida | 2024 – 2028

High School and Secondary Education - Universal Public School, Preet Vihar, Delhi

PROJECTS

Amazon Sales Intelligence & Customer Insights | *Python, SQL, Pandas, Matplotlib, Data Analysis*

- Analyzed Amazon sales dataset (10K+ records) using SQL and Python to identify top-performing products and customer trends
- Performed data cleaning, aggregations, joins, and group-by queries to generate meaningful business insights on product performance and customer behavior.
- Visualized findings with Matplotlib and Seaborn to support actionable business decisions.
- Gained hands-on experience in data extraction, transformation, analysis, and visualization.

Blinkit Sales Analytics Dashboard | *Power BI, Power Query, DAX*

- Developed an interactive Power BI dashboard to analyze sales performance, customer behavior, and product trends.
- Performed data cleaning and transformation using Power Query.
- Created KPI cards for Total Sales, Total Orders, Average Order Value, and Customer Metrics.
- Designed interactive visualizations including category-wise sales, monthly trends, top-performing products, and regional analysis.
- Implemented slicers and filters to enable dynamic exploration of business data and support data-driven decision making.

Movie Recommendation System | *Python, Machine Learning, K-Means Clustering*

- Built a movie recommendation system using K-Means Clustering and genre-based feature encoding.
 - Performed data cleaning, one-hot encoding, feature scaling, and clustering to group similar movies.
 - Developed a personalized recommendation system based on user preferences such as rating and release year.
 - Applied unsupervised learning techniques to generate relevant movie recommendations
-

EXTRACURRICULAR ACTIVITIES

- Completed 2 years in National Cadet Corps (NCC) and earned 'A' Certificate, demonstrating discipline and teamwork.
-

CERTIFICATIONS

- Quantum - Data Analytics Virtual Experience Program (Forage)
-

COURSEWORK

- Data Structures and Algorithms (DSA)
- Database Management Systems (DBMS)
- Operating Systems (OS)
- Data Analysis and Visualization
- Machine Learning
